

Sujeet Singh

SENIOR SOFTWARE DEVELOPER · AI ENGINEER

☎ +91 8351966171 | ✉ sujeets207@gmail.com | 🏠 singhsujeet0.web.app | 💻 powerfist01

Summary

Software Engineer with 6+ years of experience building production-grade backend systems, distributed architectures and scalable APIs - primarily in Python, PostgreSQL, and AWS. Proven track record of delivering high-performance systems that reduced API latency by 40% under high-traffic, data-intensive workloads. Hands-on experience integrating LLMs into production pipelines for search optimization and automated data categorization. Focused on architecting AI-assisted systems and agentic workflows, bridging system design expertise with product strategy.

Work Experience

Hexalog

Gurugram, India

SDE 2

Mar 2026 - PRESENT

- Architecting agentic document-processing pipelines using LangGraph and Claude, automating end-to-end extraction, transformation, and structured storage to S3 and PostgreSQL for logistics trade workflows.
- Designing and developing a Python-based AI microservice layer exposed over gRPC, enabling a Java backend to delegate LLM inference and AI processing tasks - decoupling core business logic from AI capabilities in a polyglot distributed system.

GreyB Research

Mohali, India

UTILITY LEAD

Oct 2025 - Mar 2026

- Scaled the patent litigation analytics and intelligence platform to 200K+ monthly visitors by leading full-cycle product development - owning architectural decisions, data pipeline reliability, and cross-functional feature delivery across the IP industry.
- Built an LLM-powered natural language search system with schema-aware SQL generation and constraint validation — enabling non-technical users to query complex patent datasets with zero hallucination risk in production.

SENIOR SOFTWARE DEVELOPER

Oct 2023 - Sep 2025

- Led end-to-end development of a global drug and patent monitoring platform, designing multi-tenant architecture with RBAC to enable pharmaceutical clients to track all FDA-approved drugs and associated patent landscapes across global jurisdictions.
- Engineered asynchronous ingestion pipelines and a queue-based alert system to monitor 1M+ patents in real time, delivering zero-message-loss portfolio notifications while reducing data processing latency by 40% under high-throughput conditions.
- Integrated Claude and ChatGPT into patent classification pipelines via prompt engineering, automating categorization by type (Molecular, Formulation, Process) and drug portfolio mapping - achieving 90%+ accuracy across multilingual datasets.
- Identified a critical gap in patent litigation analytics and drove ground-up development of the analytics platform - architecting the system across a FastAPI/PostgreSQL backend, Nuxt 3 frontend, and AWS infrastructure (S3, Lambda), scaling it to 100K+ monthly users.

SOFTWARE DEVELOPER

Jun 2020 - Sep 2023

- Built a serverless data ingestion pipeline on AWS Lambda to automate scheduled ETL of patent datasets, achieving over 20x improvement in processing throughput and enabling daily refresh cycles with no manual intervention.
- Designed and shipped Python-based automation tools to replace analyst-operated manual workflows across data collection and enrichment tasks, cutting processing time and reducing error rates by more than 90%, directly improving downstream data reliability for product features.
- Designed and optimized PostgreSQL schemas and queries for large-scale patent datasets, applying advanced indexing and query tuning techniques that delivered up to 40% improvement in query performance across high-volume analytics and search workloads.

Flick2Know Technologies

Gurugram, India

SOFTWARE ENGINEER INTERN

May 2019 - Jul 2019

- Built a CRUD-based Feedback REST API using Node.js, handling end-to-end user feedback submission, processing, and persistent storage in the database.
- Queried and analyzed 1M+ retail records using MongoDB aggregation pipelines to identify purchasing trends and customer segments.

Technical Skills

Programming Languages

Python, JavaScript, C/C++, SQL

Cloud & DevOps Tools

AWS (Lambda, S3, EC2), Docker, CI/CD, Apache Web Server

Frameworks & Tools

FastAPI, Django, Flask, Node.js, Vue.js, Nuxt 3, gRPC

AI/ML & LLMs

LangGraph, Claude & OpenAI SDK, Prompt Engineering, RAG, AI Agents

Databases

PostgreSQL, MySQL, Elasticsearch, Redis

Education

Indian Institute of Information Technology, Una

Himachal Pradesh, India

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING (CGPA: 8.17)

Jul 2016 - May 2020

Computer Science, Data Structures and Algorithms, OOP, DBMS, OS
