

Sujeet Singh

UTILITY LEAD · FULL STACK DEVELOPER

☎ +91 8351966171 | ✉ sujeets207@gmail.com | 🏠 singhsujeet0.web.app | 🌐 powerfist01

Summary

Full Stack Developer with 5+ years of experience designing and scaling high-performance APIs and distributed systems using Python, FastAPI, and AWS. Strong expertise in system design, AI/ML integration, and cloud-native distributed systems, delivering production solutions that reduced latency by up to 40% and improved reliability for high-traffic platforms. Hands-on experience integrating AI/ML capabilities into backend services and APIs to improve automation, performance, and data-driven decision making.

Work Experience

GreyB Research

Mohali, India

UTILITY LEAD

Oct 2025 - PRESENT

- Lead architectural design and technical strategy across multiple patent intelligence projects, mentoring developers and driving adoption of scalable microservices patterns, resulting in 40% faster feature delivery and improved system reliability.
- Architected and deployed AI agent pipelines for patent litigation intelligence using Claude/ChatGPT APIs, FastAPI, and Celery workers, automating case analysis and document classification to reduce manual review time by 60% for legal research workflows.
- Scaled event-tracking platform to handle 10x traffic growth through Redis caching optimization, database query tuning, and load balancing strategies, maintaining sub-500ms response times and 99% uptime under production loads.

SENIOR SOFTWARE DEVELOPER

Oct 2023 - Sep 2025

- Developed full-stack patent monitoring platform using Laravel, PostgreSQL, Celery, and Redis, implementing queue-based notification system and asynchronous processing pipelines to track 100K+ patent updates daily with zero message loss.
- Built event-tracking platform from ground up using FastAPI, Nuxt.js, PostgreSQL, and Playwright, creating distributed ETL pipelines that ingest data from multiple sources (REST APIs, file parsing, web scraping) with comprehensive error handling and retry logic.
- Integrated LLM capabilities (Claude, ChatGPT) into patent search and categorization workflows, developing API wrappers and prompt engineering strategies that improved classification accuracy by 35% across diverse patent datasets.
- Engineered automated web scraping systems with Playwright for continuous patent data collection, implementing anti-blocking measures and data validation layers to ensure 99.5% extraction success rate across 50+ target websites.

SOFTWARE DEVELOPER

Jun 2020 - Sep 2023

- Designed a backend strategy system using FastAPI and Postgres, automating daily data updates to drive 500K monthly search impressions, improving data freshness and system efficiency for large-scale integrations.
- Implemented serverless data ingestion pipeline using AWS Lambda with Python functions, achieving 10x improvement in data extraction speeds and processing structured data daily.
- Designed and developed Python-based automation solutions to replace manual workflows, achieving 20x efficiency increase and reducing processing errors by 90%

Flick2Know Technologies

Gurugram, India

SOFTWARE ENGINEER INTERN

May 2019 - Jul 2019

- Developed REST APIs using Node.js to manage retail product data, directly improving user experience by enabling faster product lookups.
- Performed advanced data analysis using MongoDB aggregations on 5M+ retail data records, identifying key purchasing trends and customer segments that informed strategic decisions.
- Developed BI dashboards using Cube.js, enhancing reporting clarity and facilitating data-driven decision-making.

Technical Skills

Programming Languages

Python, JavaScript, C/C++, SQL

Cloud & DevOps Tools

AWS (Lambda, S3, EC2), Apache Web Server, CI/CD Pipeline, Docker

Frameworks & Tools

FastAPI, Django, Flask, Node.js, Vue.js, Nuxt.js

AI/ML & LLMs

Generative AI, AI Agent, AI integration for automation and data analytics

Databases

PostgreSQL, MySQL, Elasticsearch, Redis

Other Technical Skills

Microservices, AI, OOPs, Data Structures, Algorithms, Linux, System Design, Design Patterns & SOLID Principles

Education

Indian Institute of Information Technology, Una

Himachal Pradesh, India

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING (CGPA: 8.17)

Jul 2016 - May 2020

Computer Science, Data Structures and Algorithms, OOP, DBMS, OS
