Objective

I am an experienced full-stack developer with over 3 years of experience developing and designing systems using a diverse tech stack. I have a strong skill set in web development, database design, system design and architecture. I am currently seeking a challenging software development position to utilize my expertise in developing high-quality, scalable solutions that meet business goals and user needs. I am committed to staying current with the latest industry trends and advancements, which allows me to continuously expand my skill set and adapt to evolving technologies.

Work Experience

GreyB Research Pvt. Ltd.

Mohali, India

SENIOR SOFTWARE DEVELOPER

Jun. 2020 - PRESENT

- Designing and managing the development of a progressive web application for global patent monitoring platform.
- Improved the performance of straight-through processing by tuning database applications.
- Achieved a 10x increase in data extraction speeds by leveraging AWS Lambda serverless architecture. Designed and implemented Lambda functions to significantly improve system efficiency and throughput performance for data extraction processes.
- Designed and built automation solutions to eliminate manual processes. Developed modules and programs in Python and Bash that automated repetitive data processing and system configuration tasks, significantly improving efficiency.

Flick2Know Technologies Pvt. Ltd.

Gurgaon, India

SOFTWARE ENGINEER INTERN

May 2019 - Jul. 2019

- Developed APIs using Node.js, allowing users for the retail product and enhancing the overall user experience.
- Leveraged MongoDB aggregations to perform advanced data analysis on the retail data, extracting meaningful insights and identifying trends.
- Researched and implemented Cube.js which a powerful business intelligence tool, to enhance the product's data analytics capabilities.
- Improved the performance of real-time business activity monitoring report and reduce the report response time by more than 50%

Technical Skills

General	Data Structure and Algorithms, OOPs, Git
Programming Languages	C/C++, JavaScript, Python, PHP
DevOps	Apache, Caddy WebServer, CI/CD, Docker
Frameworks	Django, Flask, Node.js, Vue.js
Databases	PostgreSQL, MySQL, ElasticSearch

Education

Indian Institute of Information Technology, Una

Himachal Pradesh, India

B.TECH. IN COMPUTER SCIENCE AND ENGINEERING

Jul. 2016 - May 2020

CGPI - 8.17/10.00

Projects

WeAsk

Q & A SOCIAL PLATFORM

- Designed and developed a progressive web app deployed on Heroku, fostering connections between students and seniors through a Q&A platform, utilizing innovative and user-friendly software development techniques.
- **Technology/Tools:** Node.js, Express.js, MongoDB, HTML, CSS

NoteApp

NOTE TAKING WEB APP

- Engineered a secure and intuitive web application featuring robust user authentication, activity monitoring, seamless registration, and convenient note-taking capabilities, ensuring a user-friendly experience.
- **Technology/Tools:** Flask, SQLite3, HTML, CSS

Extracurricular Activity

My hobbies include reading technical articles and building things based on it. Also, my interests are in playing chess and solving puzzles.
